

- ▶ **Problem Assessment / Audit / Evaluation – “Hands-on” Process**
 - Provides short, intense operations audits
 - Delivers a comprehensive assessment of critical operational systems
 - Provides an evaluation of current and potential operational performance that leads to specific project proposals
 - Not a “hands-off” plan for the client to implement

- ▶ **Low Cost / No Cost Approach**
 - Focus on what can be done now with current resources
 - Training includes real project activity with “self-funding” results

- ▶ **Expert consultants**
 - Provide the most experienced consultants who have “been there, done that”
 - Industry-experienced consultants who are action-oriented
 - Former Presidents, V.P.’s – focus on implementation

- ▶ **GEI is Flexible**
 - Equally able to improve manufacturing, service, and major business processes
 - GEI will use whatever tools and approaches are needed to solve the clients’ business issues
 - GEI does NOT use a “one-size-fits-all” approach to improvement and change

- ▶ **GEI integrates technology with “shop floor” improvements**
 - Recognize the need for more advanced technical solutions
 - Provide the expertise to develop and implement advanced technical solutions

- ▶ **FAST Results – Expect immediate results in days or weeks rather than months or years**

FAST is a registered trademark of GEI, Inc.
